

MATEO OSORIO DELHONTE

AI ENGINEER | JUNIOR SYSTEM ARCHITECT | FULL-STACK & PLATFORM ENGINEER

Lehi, UT | mateosorio01@gmail.com | +1 (435) 691-0004 | <https://www.linkedin.com/in/mateo-osorio-delhonte-5a93452ab/> | [GitHub](#)

Computer Science student, AI Engineer, and Junior System Architect with experience building and validating full-stack SaaS platforms, APIs, database-backed applications, automation systems, and iOS products. Published a full-stack mobile app used by 1,000+ users; improved team productivity by 250% and website traffic by 200%.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Swift, Java, C, C++, Kotlin, R

Frontend & Mobile: Next.js, React, HTML/CSS, SwiftUI, UIKit

Backend & Data: Node.js, Django, REST APIs, PostgreSQL, Prisma, Supabase, database design

AI, Quality & DevOps: AI automation, agent workflows, Playwright, backend/API testing, GitHub Actions, CI/CD, Git, GitHub

EXPERIENCE

SolutionStream / New Reward | Lehi, UT

Feb 2026 - Present

AI Engineer | Full-time

May 2026 - Present

- Engineer and validate client-facing SaaS features across Next.js/React, Node.js, PostgreSQL/Prisma/Supabase, REST APIs, and automation workflows.
- Perform repository audits, backend and API testing, Playwright QA, CI/CD validation, deployment troubleshooting, and release-readiness checks; translate findings into implementation plans and technical reports.
- Collaborate with engineering and leadership on route quality, data coverage, platform reliability, client-safe product behavior, and AI automation.
- Using RAG – Grounding LLM with trusted data for accurate, context aware implementation.

Junior System Architect Intern | Part-time

Feb 2026 - Present

- Design full-stack platform infrastructure, system workflows, and data flows; investigate technical debt, operational risk, and architecture improvements.
- Build agent-based automation for website updates and recurring internal processes, improving efficiency and reducing manual work.

Southern Utah University & U.S. Forest Service | Research Intern

May 2025 - Present

- Improved team productivity by 250% through workflow optimization; redesigned accessible web experiences using HTML, CSS, and JavaScript.
- Prepared technical research reports with a 100% on-time delivery record.

Osorio & Valdez Associates | IT Consultant

Mar 2024 - Present

- Co-developed and maintain a production website serving 2,000+ monthly visitors; increased traffic by 200% through redesign and SEO.
- Conduct network and security audits, hardware diagnostics, and AI automation initiatives across business workflows and digital platforms.

PROJECTS

Shoppinlyst | Full-Stack iOS Application | Published | 1,000+ users

- Built and published an end-to-end iOS product spanning the Swift mobile client, backend services, database models, persistent storage, and REST API integrations.
- Designed data flows from user actions through API requests and backend processing to database persistence, owning delivery across frontend, backend, and data layers.

Additional: BasicLyst (iOS app in development) | Code Camp Utah 2025 (functional JavaScript product built in 24 hours)

EDUCATION

Southern Utah University | B.S. in Computer Science Minor Finance | GPA: 3.65/4.00

Expected Apr 2027

Dean's List: Fall and Spring 2025/2026 | Languages: Spanish (native), English (native)
